

Whether in a highly efficient combustion engine, an intelligent hybrid system or the very latest electric drive: BorgWarner is driving propulsion system solutions of today and tomorrow. Our vision is a clean, energy-efficient world. That's why we develop solutions that reduce energy consumption and emissions, while at the same time improving performance. As a product leader in the field of propulsion systems, we are supporting the automotive industry in realizing clean propulsion and efficiency technology solutions for light vehicles, medium and heavy duty vehicles as well as off-highway applications.

The BorgWarner Fuel Systems & Aftermarket business unit in Iasi is specialized in the manufacturing of high pressure pumps (for gasoline and diesel engines) and injectors for light and commercial vehicles.

PHINIA: Combustion-Technology Leader. BorgWarner's Fuel Systems and Aftermarket business ("PHINIA") is intended to separate from BorgWarner in late 2023
