

JOIN HCL TO WORK
ON TECHNOLOGY FOR THE
NEXT DECADE, TODAY

HCL

JUNIOR DIGITAL ENGINEER (Full Time Job)

Job Description:

- ▶ With extensive training from HCL's Digital & Data Engineering Academy, you will get to explore and choose from a range of opportunities in the development and deployment of platforms.
- ▶ Training/Hands-on exposure to latest digital technologies
- ▶ Exposure to Agile delivery process & industry leading delivery practices
- ▶ Adopt best coding practices & unit testing while implementing enhancements and new features as per client requirements, specifications & schedule.
- ▶ Fix, remove and resolve bugs in codes of products to facilitate product performance (defect resolution).

Software skills:

We are looking for candidates with:

- ▶ Good fundamentals in computer programming
- ▶ Hands-on experience in programming languages (one or more from) **Java, Python, C# & Data Technologies**
- ▶ Hands-on experience in front-end frameworks/libraries (one or more from) **JavaScript, Angular, React.JS**

HCL is where you want to be if you are looking for your **1st Full Time Job** in the Software Industry.

At HCL, our **Junior Engineers** obtain practical knowledge in areas they want to specialize in while gaining the experience of working with a leading global technology company that empowers enterprises with technology for the net decade today.

With us, you get to use your design, implementation, and validation skills in Software Engineering. You will learn about Agile processes and explore new-age technologies as we enable our customers across **Financial Services** in their digital transformation.

We are committed to Diversity & Inclusion (D&I), and to Sustainable practices.
